

Contact Day 30 compatic

Technical Data

- Material: Vitafilcon A with UV protection
- Water content: 54 %
- Dk: 20
- Dk/L: 22
- Manufacturing method: cast moulding
- Back surface: bi-curve spherical
- Front surface: multi-curve spherical
- Handling tint: light green
- Diameter opt. zone: > 8.50 mm
- Central thickness (-3.00 D): 0.09 mm

Fitting recommendation

- When fitting in the minus range generally start with base curve 8.60.

ZEISS Contact Day 30 compatic is a bio-compatible monthly contact lens which is produced using a patented BioLens® process. Thanks to the combination of the new, extremely compatible material Vitafilcon A and the slim, optimally mobile lens geometry Contact Day 30 compatic is also suitable for sensitive eyes.

The key points

- Very good spontaneous comfort and long-term wearing comfort
- Bio-compatibility due to the cornea-like material
- Little drying-out due to good water-binding
- Suitable for extended daily wear
- Excellent wetting characteristics
- Good oxygen supply due to the thinness of the lens and a specially developed new edge design
- Stability zones make handling child's play

The advantages for your clients

- Very good compatibility
- Also suitable for dry and sensitive eyes
- Very good, easy handling
